*Appendix A – Practical test*

**The skill test** consists of a free- will test from the following four: SPORT GAMES, GYMNASTICS, ATHLETICS, COMBAT DISCIPLINES.

## **1. SPORT GAMES**

The candidates may choose one of the following sport games: **basketball, volleyball, handball, football**. In each game there will be two tests:

- ✓ test 1 – technical structure
- ✓ test 2 – bilateral play

**THE FINAL MARK FOR ALL SPORT GAMES**  
=  
**THE AVERAGE OF MARKS ACQUIRED AT THE TWO TESTS (without rounding off and with two decimal fraction)**

### **a. BASKETBALL**

The examination specific to the basketball game consists of two tests to which there are two marks, **the final mark** being made up of the average of the marks got at the two tests.

**TEST # 1 - TECHNICAL STRUCTURE:** is done with time keeping.

#### **Organizing the field:**

Inside the defence zone, in the corners of the restriction area, outside it, there are 4 zones (30 cm x 30 cm) which have to be touched with the foot while performing the technical structure.

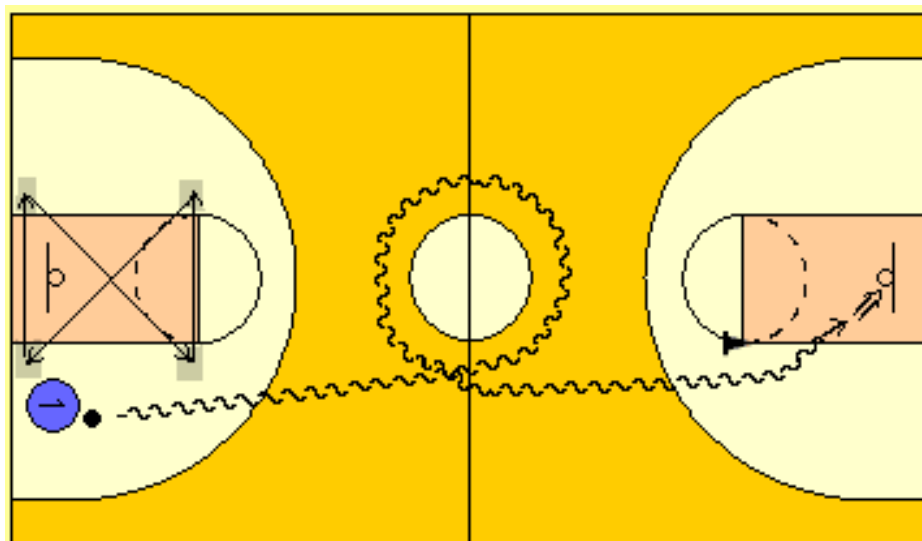

Within the attack zone, in the corner of the restriction area, there is a cone which is to be rounded in dribbling on the outside.

The ball is placed on the ground, at 1m laterally to the corner of the restriction area and 1m inside the field facing its backline.

#### **Key to the diagram:**

-  movement
-  dribbling
-  throw to the basket

**Test description:** the candidate, from the basic position, with the foot from the sideline of the field, touching the ground in the 30 cm x 30 cm zone outside the restriction area, moves on the following route:

- movement in the basic position with added step lateral and parallel with the backline of the field and touching with the foot the 30 cm x 30 cm zone from outside of the restriction area;
- movement in the basic position with added step obliquely forward and touching with the foot the 30 cm x 30 cm area from the corner of the restriction zone;
- movement in the basic position with added step lateral on the free throwline and touching with the foot the 30 cm x 30 cm area from the corner of the restriction zone;
- movement in the basic position with added step obliquely backwards and touching with the foot the 30 cm x 30 cm area from the corner of the restriction zone;
- taking over the ball from the ground, dribbling with rounding the central circle, dribble on towards the opposite basket, while rounding on the outside the cone from the corner of the restriction area and shot a lay-up.

The technical structure is performed keeping the time. The timekeeper starts the chronometer when the candidate begins the first movement and stops it when the latter releases the ball from his/her hands to throw at the basket.

The performer may do the technical structure at will, either on the right or on the left side.

Not observing the course and the way of performing the technical structure leads to the disqualification of the candidate.

The candidate performs the course twice and the best result is registered.

- *individual tactical attack actions:*

- demarcation,
- penetration,
- offensive recovery;

- *individual tactical actions in defence:*

- man to man defense
- defensive recovery;

## b. VOLLEYBALL

The volleyball examination comprises 2 separate tests, for which the participants receive 2 grades (one for each). The final grade is the average of the two.

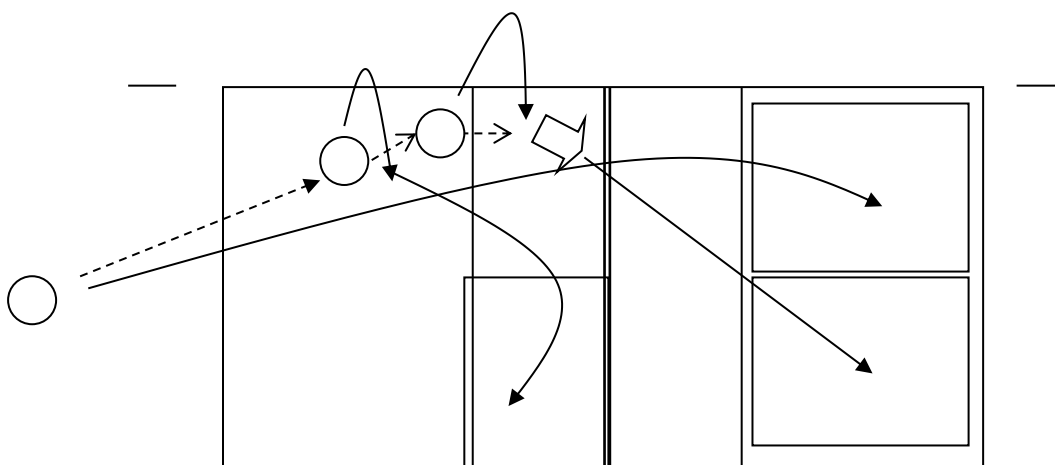

**TEST NUMBER 1:** completing a course which includes 3 individual technical and tactical game actions: **serve**, **pass (forearm or overhead)** toward the setter zone, by self-throwing the ball, and **attack** by self-throwing the ball. The actions are done this way so that the candidates' execution of the skills is not dependant on another person.

Each success during the course is given 3 points, with an extra 1 by default for being present. For example, 3 successful actions x 3 points = 9 points + 1 point by default = 10 points.

### *Test description*

**Serve** towards zone 1, move in zone 5 in own field of play, **pass** (forearm or overhead) towards setter, after self-throwing the ball, move in zone 4, then **attack** in zone 5 of the opposite field by tossing the ball to oneself.

- The trial has a 12 second time limit;
- The candidate has 3 volley balls at his/her disposal (one for each action), placed wherever it is convenient for the successful completion of the trial;
- Aside from the 3 mentioned balls, the candidates have an extra one, in order to repeat an action, should they first fail it.

### **Mentions:**

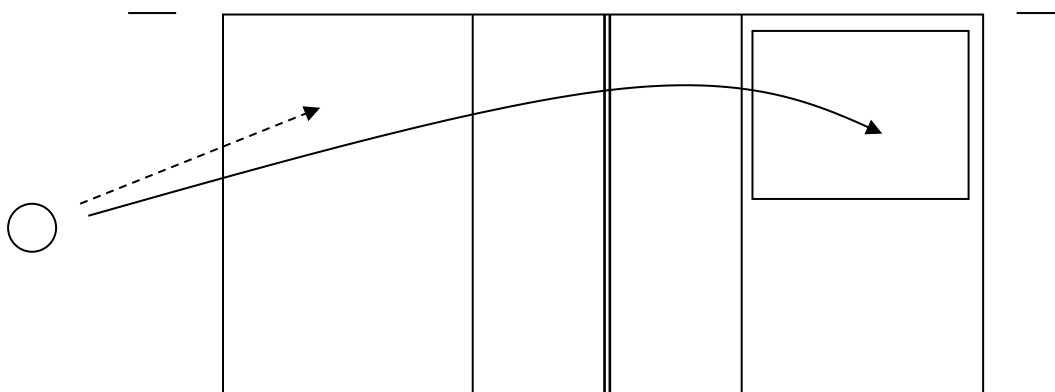

#### a. SERVE

- The serve is executed freely, overhand or underhand, from any point of the serve zone, towards zone 1, in a marked area measuring 6 m in length and 4,5 m in width, starting from the 3 m line, to the backline of the field.

- the pass is successful when its trajectory is optimal so that it can be set and lands in the marked area next to the net.
- the pass is unsuccessful when the ball is sent over the net in the opposite field, touches the antenna or the lateral band.
- a failed attempt to pass due to a bad toss is viewed as an incorrect execution.

**c. ATTACK**

- the attack is executed freely from zone 4 to zone 5 in the opposite field, by self-setting the ball, in a marked area which measures 6 m in length and 4,5 m in width, measured from the 3 m line to the backline of the field of play.
- the attack is successful when it is executed by a specific hit movement (upsurge, take off, jump, ball hit with one hand, landing), has optimal force and the ball lands inside the marked area.

**TEST NUMBER 2 - BILATERAL GAME**, based on the 1st intermediary game model, without position and zone specialization, at every inning the player occupying zone 3 as setter. In these conditions, there are no zone changes during the game, each candidate keeping his zone according to the rotation; when getting to zone 3, each candidate will become a setter.

During this trial, the way the candidates play with or without the ball will be noted. More precisely, the execution of technical and tactical individual skills will be observed, as well as the way the candidates fit in the specific collective game actions (serving, receiving, attack and defence)

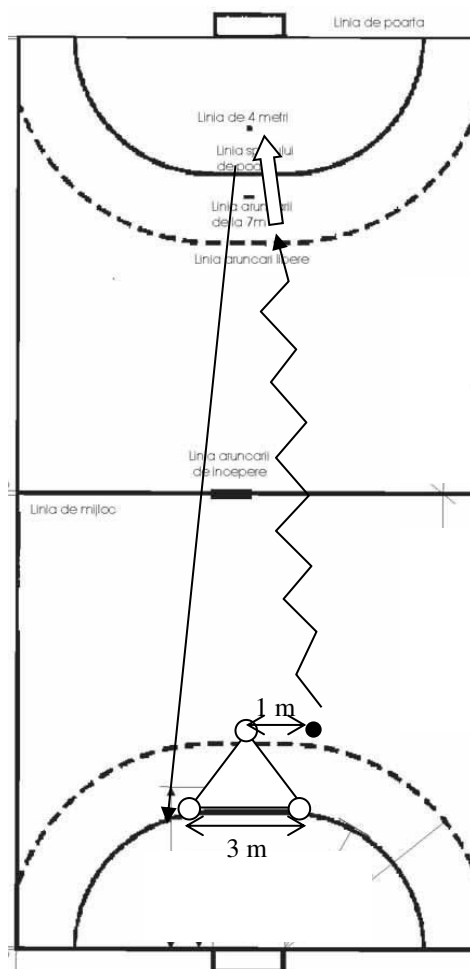

During this test, the candidate will be graded based on his evolution during the game, in the first and second lines, in offensive and defensive situations.

### c. HANDBALL

The specific examination of the handball game consists of two contest tests, where two marks are given, **the final one** being the average of the first two marks.

**TEST NO. 1 – HANDBALL TEST (timekept)**– consists in covering a route which, in the initial part, requires the fitting up of some *field guide markings* (see picture). Thus, between the 6 m line and the 9 m line *a triangle* is drawn. The base of the triangle is made up of a *straight line* (3 m) on the 6 m line and the top of the triangle is situated on the 9 m line, in front of an imaginary perpendicular raised from the middle of the triangle's base. În each of the triangle corners, a 20 cm diameter circle is drawn. At 1,5m distance laterally right to the top of the triangle, there is a ball.

**Key to the picture:**

- - angles of the triangle
- - point of setting the ball
- ~ - multiple dribbling
- - throw to the goal
- - running without the ball

**Route description:** The candidate faces the top of the triangle and with the foot inside the circle of the right side of the triangle base; he/she moves with added steps laterally to the circle on the left side of the triangle base, then forward towards the circle in the top of the triangle and backwards to the circle in the right side of the base, performing a complete lap; after touching the circle in the point from where he/she starts, he/she runs, lifts the ball from the front of the top of the triangle, performs a multiple dribbling up to the opposite side of the field and ends by throwing the ball to the goal, between the 6 m line and 9 m line; after the throw he/she quickly returns to the 6 m line that he/she started from.

## GYMNASTICS

Within the entrance examination the candidates who choose "Gymnastics" for the physical education will perform two compulsory tests:

**TEST NO.1: floor exercise – free will;** this may consist of value elements chosen from the artistic or/and rhythmical gymnastics. The value of the difficulty of the elements on combinations must totalize 9 points. This must be taken from the specific charts annexed in the "Admittance booklet". An ex officio point is given for the maximum score – 10.

**TEST NO.2: vault over gymnastics apparatus – gymnastics equipment (vaulting horse or gymnastics box]placed crosswise, at will.** There are suggested 2 vaults both for boys and for girls. Both are quoted with the 9 as a starting mark.

*The final result at "gymnastics" discipline will be made up of the average of the 2 marks acquired at the floor and the vault tests.*

### SPECIFICATIONS REGARDING THE TESTS:

- **For every test the valuation will begin with 10** – considered as a starting mark. For every test this is made up of:
  - 1 point ex officio + 9 points – standing for the value** of the whole element difficulties comprised in the free will floor exercise (test 1);
  - 1 point ex officio + 9 points the value of the vault** the candidate chose (test 2);
  - From each starting mark, the penalizations are diminished for the execution, when needed.**
- For **test 1** the elements from the table below are chosen, so that the accumulated values should be **9 points**.

### Comments

During the exercise, the elements chosen by the candidates have to find themselves within the content of the exercise **only once!** No repetition of an element or gymnastic combination will be taken into consideration. Within the exercise, the candidates must have an element of the 3 value categories: one of 3 points, one of 2 points and one of 1 point.

### ! PAY ATTENTION!

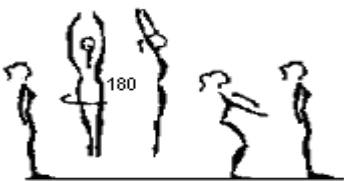

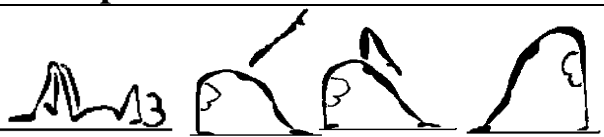

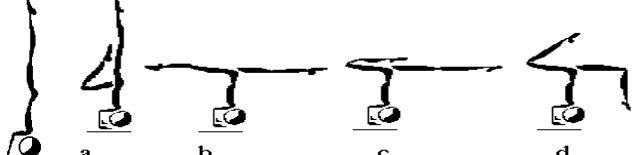

- *The elements suggested for the test 1 – floor exercise address to everybody, boys and girls (even if the drawing shows a boy or a girl);*
- *If the requirements of logical and fluent construction of elements lead to initial and final positions different from those in the drawing, the elements are taken into consideration;*
- *The candidates are recommended to choose elements of various values, so that the sum total of their values should be 9 points. In case the sum is smaller, the starting mark will also be lower and the possibility of getting the best mark is out of the question.*

#### Guiding examples of combining the values:

- (4 elements x 1 point) + (1 element x 2 points) + (1 element x 3 points) = 9 points;
- (1 element x 1 point) + (1 element x 2 points) + (2 elements x 3 points) = 9 points;
- (2 elements x 1 point) + (2 elements x 2 points) + (1 element x 3 points) = 9 points;
